

**Piedmont Reproductive Endocrinology Group (PREG)  
Egg Donor Program**

*Help Dreams Come to Life,  
Be an Egg Donor*

**\* PREG is recruiting young, healthy, non-smoking females from 21 to 26 years of age for evaluation for potential egg donation**

**\* \$4000.00 monetary compensation for your time and generosity**

**Donor Egg Success Rates**

Potential anonymous egg donors are generally recruited from a variety of sources and advertising. In addition, donors voluntarily contact us. They may know someone (friend or relative) who has been unable to have children and would like to be able to help fulfill the dreams of having a family for a deserving couple. There is \$4000.00 compensation paid to the donor for their time and efforts.

The average success rate of pregnancy using donor eggs is usually from a 50 to 70% chance but may also depend on many other factors as well. PREG's 2008 Live Birth Rate ("take home" baby) was 68.8% from all the fresh donor egg recipient IVF cycles performed in the 2008 calendar year.
